- ✓ For use with Stainless Steel Cable Ties (SST-200 & SST-360)
- ✓ Easy to use
- ✓ Adjustable tension
- ✓ Built in cutter
- ✓ Suits 4.8 to 7.8mm wide ties

Tension Indicator

Tension Adjustment Wheel

PRODUCT DESCRIPTION

Automatically tensions and cuts stainless steel cable ties in one simple operation. Adjustable tension for standard 4.8mm and heavy duty 7.8mm ties. Low friction to ensure ease of use.

It is recommended that FireSense stainless steel cable ties be used for fixing cable to tray every 1.0 meter when mounted horizontally and every 0.6 metres when mounted vertically. When fixing FireSense fire rated cables to catenary wire our manufacturer's recommendation is as follows:

If cable bunch is ≥ 25mm diameter cables should be supported with stainless steel ties every 300mm.
If cable bunch is < 25mm diameter cables should be supported with stainless steel ties every 600mm.

Ideal for use with:

- ✓ FireSense SST-200
- ✓ FireSense SST-360
