

FEATURES

- ✓ Suitable for all Xtralis Aspirating Smoke Detectors
- ✓ Improved detector longevity in applications with high levels of air-borne contamination
- ✓ Reduces maintenance intervals, thus reducing total cost of ownership
- ✓ Requires no additional pipe fittings, thus reducing cost of installation
- ✓ Improved aesthetics
- ✓ Vertical or horizontal mounting
- ✓ Compatible with metric (25mm OD) and imperial (1" OD) pipes eliminating the need for pipe adaptors

PRODUCT DESCRIPTION

In-Line Filter provides superior performance in terms of improving detector longevity and reducing maintenance frequency.

Having tapered inlet and outlet means the Xtralis In-Line Filter is easily fitted in line with the sampling pipe without the need for any additional pipe fittings hence reducing the cost of installation. Filter elements can be easily replaced without having to remove the filter from the pipe network hence simplifying maintenance.

Its elegant design blends in seamlessly into the installation where up to four can be installed side-by-side on Xtralis multi-pipe installations.
