

2 January, 2007

Dear Valued Customer,

Notifier will discontinue the following conventional direct-wire ionization smoke detectors effective March 1, 2007:

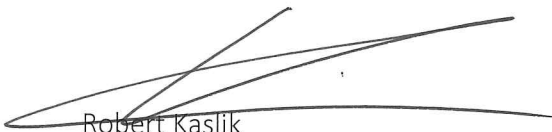

Part Number	Description
1400	2-Wire Ionization detector, direct wire, 12 or 24 volts
1412B	4-Wire Ionization detector, direct wire, 12 volts
1424	4-Wire Ionization detector, direct wire, 24 volts

The replacement product for these models will be the conventional plug-in ionization smoke detector, part number 1451, with applicable mounting base.

All orders for the 1400, 1412B and 1424 detectors must be placed before March 1, 2007. After March 1st, only orders for the ionization smoke detector will be accepted.

Please contact FireSense if you have any questions regarding this notice.

Yours Sincerely,

Robert Kaslik
