

HORN-20 20W Horn Speaker with Capacitor

FEATURES

- ✓ Weather resistant
- ✓ UV stabilised
- ✓ Superb speech and music reproduction
- ✓ Emergency PA and EWIS compatible

PRODUCT DESCRIPTION

The HORN-20 speaker is designed primarily for distributed paging systems where a high degree of speech articulation and program clarity is paramount.

Typical applications include schools, train and bus stations, airports, car parks and plant rooms. A screwdriver adjustable power tap switch is provided, as is a 22uf bipolar isolation capacitor to permit line monitoring function when employed with emergency PA and EWIS installations. A 4 core loop through lead is also provided. Features nickel-chromium plated mild steel hardware, making them ideal for aquatic centre installations and alike.
