

#### FEATURES

- ✓ Tough UV stabilised high impact ABS construction
- ✓ Durable powdercoated mounting bracket stainless steel fixings
- ✓ Exceptional music and speech reproduction
- ✓ Selectable power taps
- ✓ Uses a high efficiency driver and line transformer (suitable for indoor or outdoor use)
- ✓ Includes 7 core cable for easy installation
- ✓ Weatherproof

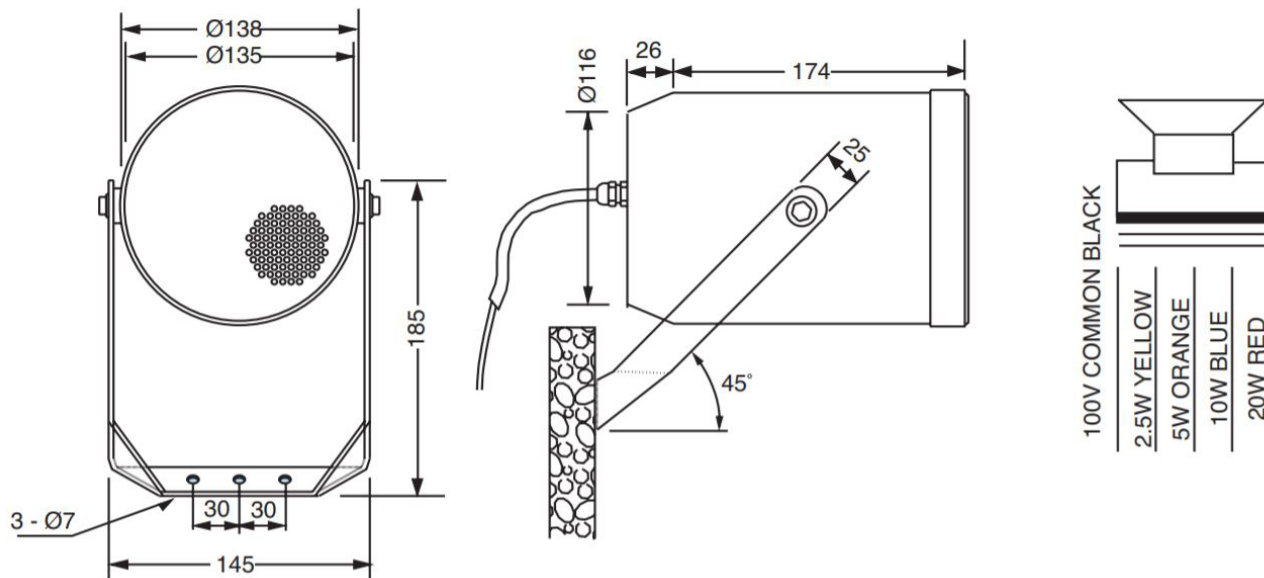

#### PRODUCT DESCRIPTION

The REDBACK® sound projector is made from strong UV stabilised ABS plastic with a perforated metal grill. It is designed for use in 100V line distributed systems. Sound projectors offer a wide dynamic range making them ideal for both paging and background music applications. Typical applications include sport stadiums, train station platforms, shopping centres, aquatic arenas, etc.

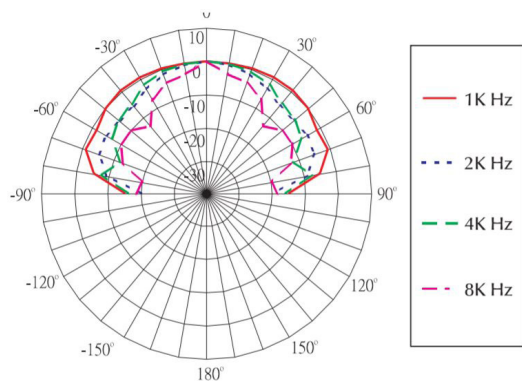

#### TECHNICAL SPECIFICATIONS

Rating	20W
Power Taps	2.5W, 5W, 10W, 20W
SPL 1W @ 1m	92dB @ 1kHz (+/- 2dB)
Frequency Response	110Hz - 18KHz
Dimensions	180mm diameter x 195mm D
Weight	1.9kg
IP Rating	IP65
