- ✓ Can hold up to 2 x multi I/O modules

PRODUCT DESCRIPTION

FireSense manufactures its own range of custom DGP enclosures. FireSense DGP's are made from galvanized sheet steel to prevent corrosion and come complete with cable knockouts top and bottom for ease of installation.

The DGP1 can hold 1 set of double stacked multi I/O modules circuit boards.

FireSense can custom manufacture these DGP's specific to each project's requirements. DGP's save valuable time on site and are factory assembled and tested prior to installation.

DIMENSIONS

300mm H x 283mm W x 75mm D
