PRODUCT DESCRIPTION

The ONESHOT speaker range has excellent speech intelligibility and has been produced using a high fidelity twin cone driver, used for BGM and PA announcements.

These speakers come with a wide range of tapings from 0.33W to 5W. The patented 6 way latching clips ensure a fast fit application.

The 100dB output models of the ONESHOT range are available to mount directly to the underside of concrete slabs or inaccessible ceilings and are recommended for plantrooms, warehouses, shopping centres, etc.

Each speaker is fitted with an inline capacitor for use on 100V line PA systems for monitoring purposes.

A surface mount option (including both speaker and surface mount) is also available as a 100dB option.
