

Weatherproof Enclosure for Manual Call Points or Stop Gas Stations

FEATURES

- ✓ Used as a guard against physical damage to a manual call point or stop gas station
- ✓ Cover is UV-stabilized against sun deterioration
- ✓ Polycarbonate rated -40°C to 49°C
- ✓ Closed cell gaskets
- ✓ Suitable for indoor and outdoor
- ✓ Weatherproof IP54 rated, when STI-1280 and extra STI-3002 are installed (see ordering information table)

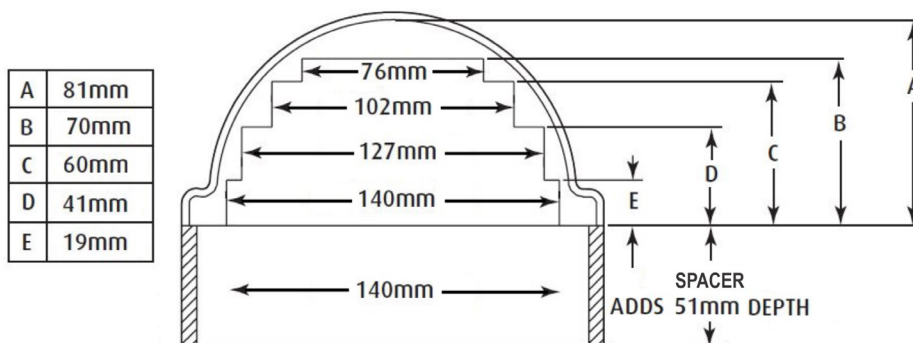

PRODUCT DESCRIPTION

The STI-3150 offers protection against physical damage (both accidental and intentional), dust and grime as well as severe indoor and outdoor environments without restricting legitimate alarms. It is ideal for schools, universities, hospitals, nursing homes, stores, hotels and public buildings where there is a threat of false fire alarms.

The STI-3150 consists of a clear, tamperproof, super tough polycarbonate shield and frame that fits over manual call points or stop gas stations. It is intended to be used in areas where the incidence of false activation has proven to be a serious problem.

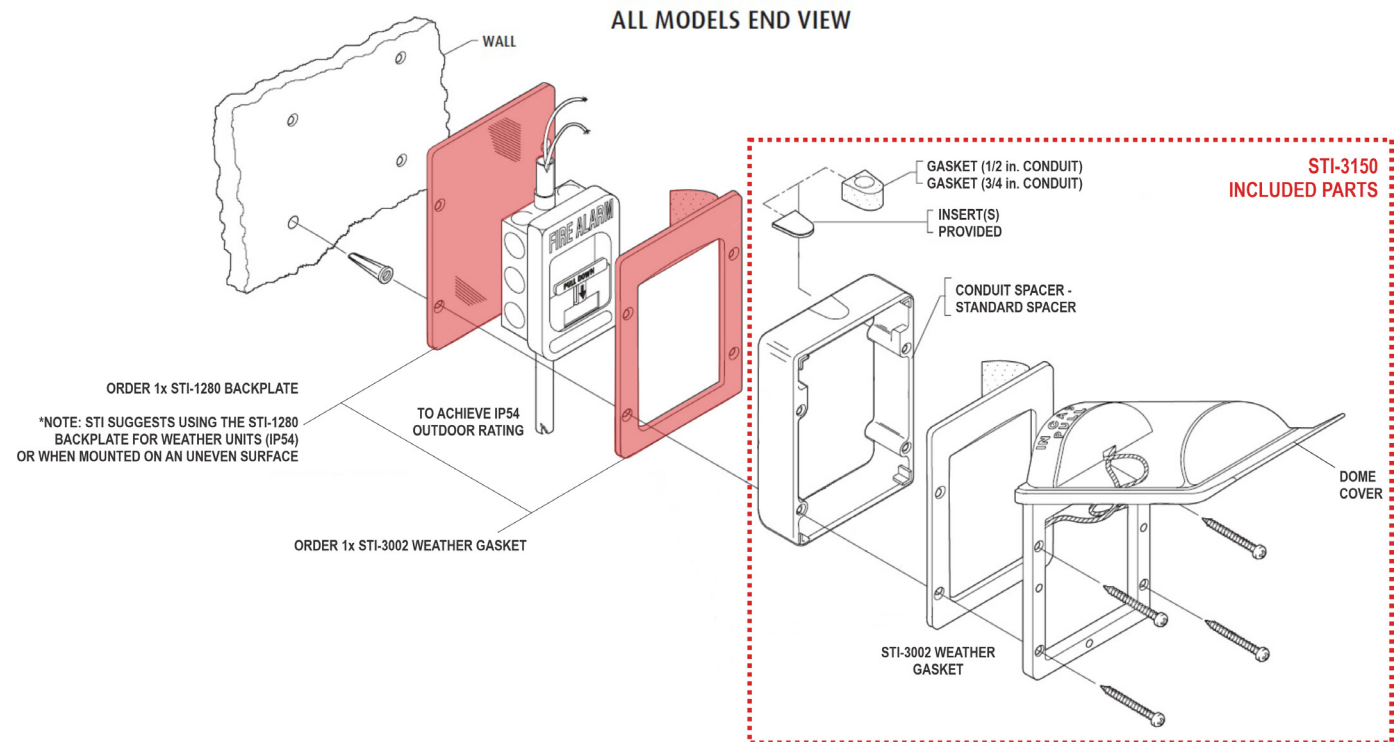

Note: This is an indent item, lead times may apply.
