PRODUCT DESCRIPTION

SSF-P-951 intelligent plug-in smoke detectors are designed for both performance and aesthetics and are replacements for the 851 Series detectors. A modern, sleek, contemporary design (available in white, ivory & black) and enhanced optical sensing chamber is engineered to sense smoke produced by a wide range of combustion sources in accordance with more stringent code standards.

The SSF-P-951 detector sensitivity can be programmed in the control panel software. Sensitivity is continuously monitored and reported to the panel. Point ID capability allows each detector's address to be set with rotary, decimal address switches, providing exact detector location for selective maintenance when chamber contamination reaches an unacceptable level.
